

Better has never been so easy

The Enphase Home Energy Solution

Deliver a system that brings together smart technology, sophisticated software, and a flexible architecture that can evolve and expand to meet your customers' needs.

The world's first truly integrated energy system

SMART TECHNOLOGY

The Enphase Home Energy Solution includes highly reliable and rugged components which can be remotely monitored and controlled to deliver higher performance.

SOPHISTICATED SOFTWARE

The benefits of a software-controlled system include the ability to provide support services over the lifetime of the system without any hardware replacement or truck-rolled, hands-on labour.

FLEXIBLE ARCHITECTURE

By combining smart technology with sophisticated software you get a system that can be remotely updated to maximise ongoing performance and meet any changes in AS/NZS 4777 Standards for years to come.

Enphase Microinverters

- Reliable performance with over 400k systems installed in over 100 countries
- High production, maximising the potential of each module
- Advanced technology, remotely updates to meet ongoing compliance

Enphase AC Battery

- Lowest cost of entry
- Easily retrofits for any PV System
- Safest chemistry available paired with low-voltage AC

Enphase Envoy

- Bi-directional networking enables remote updates to the system
- Expands to provide energy consumption metering
- Flexible networking via Wi-Fi, ethernet or cellular option

Enlighten Software

- Provides ongoing assurance and energy insight.
- Accessible on any web-connected device
- Features to help you remotely manage and maintain multiple systems

Offering your customers more is simpler than ever

So simple to install, the Enphase Home Energy Solution helps you easily expand your audience. It's good for you and your customer.

Did you know? You're already a home energy expert

We've made it easy for you to become a home energy expert, so you can deliver more to a broader range of customers. It's a simple way to grow your business without increasing your costs.

You now have access to customers you never considered before

Now you can offer solar, energy storage or both, giving you new opportunities as well as the potential for retrofits. Offer storage to existing Enphase customers or even homeowners with other solar technologies—the Enphase Home Energy Solution works with any PV system.

“With Enphase, we can offer our customers any size system for any situation—zero export, shading, storage. Homeowners love it, and there is no comparison in quality and technology.”

— **Tom McClelland**, Hush Energy from Queensland
